

Linen Flax Horse Bedding

Linen Flax is the most superior horse bedding for many reasons. This incredibly absorbent, dust free, natural product is so soft making your horses stable dryer, softer, warmer and more comfortable.

This in turn offers your horse superior foot health and optimum respiratory care.

Absorption

- One of a kind, all-natural fibre made from flax stalks
- Best-in-market absorption properties designed with long-term cost-efficiency
 - 5 TIMES more absorptive than wood shavings
 - 10 TIMES more absorptive than straw
 - Far less bedding used and considerably less wastage.

Extreme Comfort

- All natural material creates softness

Easier Stable Maintenance

- Superior absorption quantities and odour eating ability
- Reduces stable odour through moisture-locking and containment, including the ammonia scent of urine
- Less is more; easy to spread, easy to clean
- Creates a comfortable surface for a horse to lay on more frequently
- Minimal- to no-dust-related issues to promote easy breathing
- Quick to muck out and a much smaller muck heap.

All Natural and Compostable

- Fully compostable, naturally biodegradable, non-toxic product that promotes soil fertility and plant growth

Linen Flax Horse Bedding

Starting to use Linen Flax Horse Bedding

Please follow these suggestions to get the absolute best for your Horses comfort

Putting Down Your Flax Bed

Solid Floor (no rubber matting)

12' x 12' without banks

7 - 8 bales

Empty the correct no. of bales on floor, track them in with your feet. It may go against your thoughts but add water if preferred, to establish as firm a base to the bed as possible. The bed will move a little initially and will settle in 7/10 days. Settled depth needs to be c.8" (20 cm)

Rubber Matting

12' x 12' with rubber matting

5 - 7 bales

Cover at least half the total area to a depth of 6" to 8". The bed will settle well in 7/10 days but must have a good depth in order to absorb the wet. Create a firm edge by brushing the rubber matting up to the bed line.

Changing to Linen Flax from Existing Bedding

Straw bed: take all the straw out.

Shavings or hemp bed: Ideally remove existing bed. However if clean, top up with Linen Flax until original bed has gone. Full benefits of Linen Flax will not be apparent until old bed has gone.

Maintaining and managing the Linen Flax Bed

Remove droppings regularly, with rubber gloves or fork. Droppings will become easier to remove as the bed becomes established. Only remove wet material once or twice a week, topping up with sides or banks, and then top up sides with fresh material. Use a bedding fork to rake over surface, giving the bed a fresh, level finish, but **disturb the under-part of the bed as little as possible**.

Linen Flax is a high performance bedding and, as such, needs care to maximise its benefits to both user and horse.
